No Impacts

Minimal Impacts

Moderate Impacts

Severe Impacts

WEATHER KEY POINTS

04/01/22 - 04/07/22

Friday - Thursday

- Very warm temperatures will be noted across the Central Valley and southern deserts Friday and Saturday, with afternoon readings in the 80s and lower 90s. Minor heat impacts are possible, though cool overnight low temperatures will help.
- Even warmer temperatures look to build over more of the state for the middle of next week. During this time, record-setting high temperatures are possible over portions of the Central Valley and southern California
- Mainly dry conditions will also continue for the majority of the state through the middle of next week, with the exception of far northwest California where some light rain is expected Sunday night and Monday
- Periods of gusty winds could develop over the Sierra and southern California mountains Sunday and Monday, persisting across southern California into the middle of next week

PRECIPITATION FORECAST

04/01/22 - 04/03/22

No significant precipitation is expected through Sunday

Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms may produce locally higher rainfall amounts.

Precipitation (inches)

WEATHER OUTLOOK

04/06/22 - 04/14/22

6-10 Day Outlook (April 6 - April 10)

Temperatures

- Above normal temperatures are strongly favored to continue statewide

Precipitation

- Below normal precipitation is strongly favored for the majority of the state

8-14 Day Outlook (April 8 – April 14)

Temperatures

- Above normal temperatures are favored to persist for the southern half of the state, with below normal temperatures slightly favored for far northern California

Precipitation

- Below normal precipitation is slightly favored for southern California, with above normal precipitation slightly favored for far northern California
